

Instructions for Microchip and DNA

YOUR VETERINARIAN MUST DO THE DNA AND MICROCHIP

Please follow the instructions on the UC Davis Submission form

A self-addressed envelope to UC Davis is included, and need to be sent there !!

Please check and read the Microchip transponder before insertion. The chip is implanted intramuscularly on the left side of the neck approximately 2-3 fingers below the mane at a depth of 2-3 cm.

One transponder label is placed on the Marking Sheet.

When marking swirls (cowlicks) they will need to get marked in black ink and a minimum of 5 swirls are needed (they can be found on the head, top of the neck, and base of the neck, white markings are to be put on in red ink. All markings must be done with permanent ink.

Please make sure the Marking Sheet is filled out completely. Stamped and signed by Veterinarian. The Marking Sheet must be mailed back to FPZV USA in the envelope provided.
