

Friesenpferde-Zuchtverband e.V. (FPZV)

## **STALLION KEURING X-RAY EVALUATION**

*This “Stallion Keuring X-Ray Evaluation Report” must be prepared by a veterinarian, signed and returned to FPZV USA prior to entry into the Stallion Performance Test/Stallion Keuring. The X-ray films must be labeled with the name and registration number before the development of the films to verify the identification. The original films (disc only) are kept at the FPZV office. Serious abnormalities result in no entry into the Stallion Book or cancellation of approval. The decision is made by the Keurings and Registration Committee with the agreement of the equine veterinarian.*

**Stallion’s registered name:** \_\_\_\_\_

**Registration number:** \_\_\_\_\_

**Date of Birth:** \_\_\_\_\_

**Registered owner:** \_\_\_\_\_

**Required X-ray Films:** Technically perfect X-ray films must be produced including,

1. Lateral views of all four feet including fetlock joints (from hoof to the middle of the cannon bone),
2. Frontal views of the two forelegs to show the navicular bone
3. Both hocks in at least two different projections (70 degrees and 115 degrees). (By definition, 0 degrees is a frontal view and 90 degrees is lateral-medial.)

**X-rays must be analyzed and the findings placed into one of 4 different X-ray categories according to the European X-ray Commission:**

**Group 1:** X-rays without abnormalities or with findings classified as insignificant

**Group 2:** X-ray findings which deviate mildly from the norm, for which clinical relevance unclear, uncertain or unknown.

**Group 3:** X-ray findings which deviate significantly from the norm but the potential negative impact on performance is uncertain.

**Group 4:** X-ray findings which will with utmost probability lead to negative impact on performance.

**Additional grading of navicular bone disease: Degree one:** no abnormality

**Degree two:** widened canals

**Degree three:** “clubby” widened canals

**Degree four:** “Swiss-cheese-like” appearance

• **Lateral Views of Feet:**
